My name is Nicolás Piantini, I am 28 years old and I live with my family (my mother, two siblings and my dog Yuna) in the province of Mendoza, Argentina. Throughout these years, I went through different university careers related to Engineering and Accounting,, looking for what identifies me as a professional. Later on, I enrolled as an Insurance Consultant Producer, a job I currently perform in a customer service office. Recently I graduated from the Bootcamp "Soy Henry" as a Full Stack Developer

I consider myself a responsible person, involved in his work, with a lot of dedication and enthusiasm for learning new things. My goal is to insert myself in the IT world to continue growing and developing as a professional, constantly training and learning new technologies.

WORK EXPERIENCE

San Cristobal Seguros
Insurance Consultant Producer

I enrolled as an Insurance Consultant Producer, a job I currently perform in a customer service office

PROJECTS

Bolsillo Feliz
Final group project for which we graduated from the Bootcamp "Soy Henry", using the following technologies: JavaScript, React, Redux Toolkit, HTML, CSS, Node.js, Express, PostgreSQL, Git, Jira and Trello. This project consists of a web application that shows and compares products from different super markets, allowing you to register your own market and know the location of them, as well as ordering their products through different filters.

PI - Dogs
Individual project for "Soy Henry" made with the following technologies: JavaScript, React, Redux, HTML, CSS, Node.js, Express, PostgreSQL and Git, which is to display on screen a list of breeds of dogs of all kinds with their respective characteristics, such as temperament, height, weight, etc.. It is also possible to add new dogs with their respective photo to be displayed on the page and sort them through different filters.
